SUMMARY

Frontend-focused full-stack engineer with 5+ years building web and mobile products with React, Next.js, TypeScript and React Native, plus Node.js and PostgreSQL backends. Sole architect of a production financial platform, led LLM integrations for a New York-based product, and rebuilt a dental platform used by 60,000+ people across Latin America.

SKILLS

Frontend: TypeScript, JavaScript, React, Next.js, React Native, Redux, Zustand, Tailwind CSS, shadcn/ui, HTML, CSS, Vue.js

Backend & Data: Node.js, Express, REST APIs, PostgreSQL, Prisma, Firebase, Supabase, Python (FastAPI)

Testing: Vitest, React Testing Library (unit and integration tests)

AI: LLM API integration (Perplexity API), AI-powered search, AI-assisted development (Claude Code, Cursor)

Tools & Practices: Git, GitHub Actions, Vercel, Shopify (Polaris), Salesforce, code review, pair programming, Scrum

WORK EXPERIENCE

Aerolab | Software Engineer

Remote | Jan 2025 – Jun 2026

Digital product agency with offices in Buenos Aires and New York, building apps and websites for startups and large companies.

- Shipped features end to end with Next.js, React and TypeScript for a New York-based product in a multicultural team, with unit and integration tests in Vitest and React Testing Library.
- Led LLM integrations for search and profile enrichment over a 50,000+ user database, improving result accuracy and significantly reducing query times.
- Improved critical component performance by 30%+ and unified the UI with a reusable component system (shadcn/ui).
- Built internal AI tools that streamlined cross-team workflows and powered client upselling features.

Tech: Next.js, React, TypeScript, Node.js, Python (FastAPI), Supabase, Zustand, Tailwind CSS, Perplexity API, Salesforce

Online Procesamientos | Software Engineer

Remote | Mar 2024 – Jan 2025

Argentine company providing payroll processing and management software to condominium administrators.

- Sole architect and developer of the company's software, owning frontend, backend, data model, testing and deployment.
- Built a React and TypeScript web app for administrators, backed by Node.js and Firebase, that generates PDF statements and sends email and WhatsApp notifications.
- Automated expense and salary statement generation, cutting operational load times by 40% and reducing reporting errors.

Tech: React, TypeScript, Node.js, Express, Firebase, Render, Tailwind CSS, shadcn/ui, Vitest, React Testing Library

GM2 | Software Engineer

Remote | Aug 2022 – Mar 2024

Digital product company with teams in the US, Mexico and Argentina serving startups and corporations.

- Built web and mobile apps for healthcare, e-commerce and aeronautics clients with React, Next.js and React Native.
- DroneUp: built the real-time operations dashboard used by US airspace authorities to manage drone flights.
- ReKeepit: built a Shopify widget that turns refund requests into personalized discounts, increasing customer retention.
- Wrote unit and integration tests (Vitest, React Testing Library), ran code reviews and helped define dev standards.

Tech: React, Next.js, React Native, TypeScript, Redux, Shopify Polaris, Material UI, Chakra UI, Vue.js, Contentful

Bowery Creative Studio | Frontend Engineer

Buenos Aires, Argentina | May 2021 – Aug 2022

Product studio providing on-demand engineering teams embedded in client product teams.

- KeepSmiling: led the redesign of a dental platform used by 60,000+ people in LATAM, cutting search times 10x.
- MyElixa: built a React Native app tracking seniors' water intake via a bottle-mounted band, showcased at CES 2021.
- Rebuilt legacy systems with modern component architectures alongside UX/UI designers and backend developers.

Tech: React, React Native, TypeScript, Redux, Bootstrap, REST APIs

EDUCATION

Technician in Automation and Control Systems | Técnica Los Andes (ECTLA), Bariloche

2012 – 2017

Programming foundations from Assembly and Arduino to HTML, CSS and JavaScript; strong technical English.

LANGUAGES

English: Full professional proficiency (C1) | Spanish: Native
